Change of Quarters.

3.

a. The Ludendorff Kaserne in POTOSI, which was vacated by components of the 2d Gds AAA Div in early July 1952, was occupied by an advance party of the 34th Arty Div (US) from the Delius Kaserne in mid-August 1952. It is expected that elements of this division will occupy the kaserne upon completion of the summer training in October 1952.

b. The former Norddeutsche Maschinenfabrik in LUCKENWALDE was vacated by the 91st Gds IL Regt of the Third Gds Necz Army at the end of August and the beginning of September. The regiment moved into Stalags I and II. The Norddeutsche Maschinenfabrik has presumably been occupied by a training unit of the Third Gds Necz Army. Elements of the unit are quartered in requisitioned houses on Am Schieferling.

c. [ ] the unit in the barracks installation in PELLA-TINZ which has been stationed there since the winter of 1951/1952 and, possibly, is an artillery training unit of the Eighth Gds Army, was allegedly transferred to JELLINE.

d. The barracks installation in BAUTZEN was vacated by the rear details of the 44th Gds Tank Regt of the 11th Gds Tank Div in mid-August and the quarters were placed at the disposal of a VP regiment (air force). The new location of the 44th Gds Tank Regt has not yet been determined.

e. The former DAF (Deutsche Arbeitsfront) (German Labor Front) building and the Pusserkrug in SCHWERIN have been reoccupied since the beginning of August 1952 by personnel of the 94th Gds Ktz Rifle Div who are to be trained so that the German personnel hitherto employed in barracks installations can be dismissed.

f. The transfer of the two AT artillery brigades of the Second and Fourth Gds Necz Armies [ ] was made in mid-September 1952. The 2d Light Arty Brig (US) of the Second Gds Necz Army moved from the restricted eisse Stadt settlement, ORANIEBURG, to the Olympisches Dorf, DORBERITZ. The 11th Gds AT Arty Brig of the Fourth Gds Necz Army started moving from Olympisches Dorf to the former German Army clothing depot I, B BERAU, in the middle of September. The Soviet main clothing depot of the GFG, [ ] previously stationed in BERNAU, was transferred to HAUPTFURT/Oder.

4.

[ ] the Soviets plan to again transfer the Hq GFG with its offices. The last move of the Hq GFG took place in the beginning of June 1952 when it was transferred from POTOSI to [ ]. It may have been planned

ILLEGIB

SECRET

- 6 -

25X1

from the beginning to use the barracks installations in the JUHNSDORF-ZOSSAU area only as intermediate quarters for the Hq GONG, which undoubtedly moved with haste in June 1952. There is a possibility that the underground installations near JUHNSDORF-KALKURGE, where several large barracks installations are under construction, as well as those near TALMUTHAUSN may be used as quarters for a high-echelon headquarters. Both installations are connected directly with the BERLIN-MOSCOW long-distance telephone line.

Training and Field Exercises.

5. Division Training.

Prior to the middle of September 1952, there were no changes in the occupation of the old troop training grounds. The occupation has remained constant since May 1952. Prior to mid-September, training largely included field exercises at battalion and regimental level as well as exercises with mixed combat teams. Major troop contingents moved from the troop training grounds of TIEPLIN, LITTESTOCK and LETZLING BEATH to maneuvers in the LETZLING BEATH-BARTHENOW area during the second half of September, while other components, at these and other troop training grounds, completed their summer training and returned to their military posts during that period. Specifically, the following information on training activity and movements is available:

25X1

KINDWL: No change in the occupation of the troop training grounds until mid-September. The following units were confirmed: the majority of the 57th Gds Ntz Rifle Div in Camp KINDEL south of Highway No 04 with elements in a small hutment at Kuenkelhof, northeast of GROSSER LUPHITZ; and corps troops of the XXIX Gds Ntz Rifle Corps, including the corps artillery brigade from IMMEBURG and the 94th PL Regt (US) from LEIPZIG-SCHONHAU, in Camp Haina-Holz west of HAINA. Elements of the regiment practiced firing at ALTFERBACH from 4 to 9 September. Components of the 17th Gds Tank SP Regt of the 57th Gds Ntz Rifle Div moved to LETZLING BEATH on 27 September. In 1951, Camp Haina-Holz was occupied by the 21st Gds Nocz Div from HALLE. [redacted]

25X1

[redacted] the 57th Gds Ntz Rifle Div would return to IMMEBURG on 18 October 1952.

OERDRUF: In mid-September, the barracks installations at OERDRUF were still occupied by the majority of the 39th Gds Ntz Rifle Div, the wood camp northwest of OERDRUF by the majority of the 20th Gds Nocz Div and Camp PETERRODA by corps troops of the XXVIII Gds Ntz Rifle Corps. Components of the 25th PL Bn (US) of the 20th Gds Nocz Div practiced firing at ALTFERBACH from 30 August to 9 September and components of the 316th RL Regt (US) of the XXVIII Gds Ntz Rifle Corps from 6 to 10 September.

[redacted] until their departure to HEININGEN on 31 August, major components of the 117th Gds Ntz Rifle Regt must have been at the training grounds as elements of the 87th Gun Arty Regt from PLAUNN were there from about 15 September until 19 September. Units of the 21st Gds Nocz Div from the LOSSA troop training grounds had also been at OERDRUF during the same period and, elements of the 39th Gds Ntz Rifle Div from the OERDRUF troop training grounds were at LOSSA. A large-scale

25X1

tank exercise involving several regiments [redacted] SC LAMMUSSEN-OERDRUF road on 17 September. About 1 October, elements of the 36th (?) Tank Regt (US) of the 20th Gds Nocz Div returned to BEITE and elements of the artillery brigade of the corps returned to PFA.

SECRET

SECRET

- 7 -

25X1

25X1

**LOCSA:** The majority of the 21st Rds Kocz Div from HALLE was [redacted] at LOCZA at the beginning of September. Elements of the 25th RL Bn (US) were at ALTMERGEBOW from 30 August until 6 September. Other components of the division held short-term exercises at OBERHOF during the first half of September.

**BAD KOESSEN:** The quarters at the training site have continuously been occupied by engineer units of the Eighth Gds Army until the end of September. [redacted] the units departed toward MUEBURG on 29 September, presumably to participate in further exercises.

25X1

25X1

**LITZLING****HEATH:**

No changes in the distribution on the individual quarters of the units stationed there since May 1952 [redacted] during September. However, it is reasonable to assume that numerous tank firing details of all armies except for the First and Fourth Gds Kocz Armies, were in the southern sector of LITZLING HEATH in September as was the case in the spring. \* The following movements from the troop training grounds were made after 20 September:

25X1

- a. Departure to LOCZAU and, possibly, for field exercises on the Elbe River north of MAGDEBURG, of components of the 7th Gds Tank Div.
- b. Departure of elements of the 10th Gds Tank Div for field exercises of the Fourth Gds Kocz Army in the ENTENAU-MENDELHAUSEN area and direct return to KAPNITZ and BANDENBURG of other units.
- c. Return of elements of the 136th Gds Av Tank SP Regt to BURG.
- d. Elements of the 207th Ktz Rifle Div concentrated in the northern sector of LITZLING HEATH possibly departed to participate in Third Shock Army exercises in the area east of LITZLING HEATH. Components of the 19th Gds Kocz Div from Camp BORN may also have departed for the same reason, however, the camp appeared to be still occupied on 2 October.

Starting about 20 September, the Third Shock Army conducted large-scale fall maneuvers in some sections of LITZLING HEATH and in the area adjoining to the east as far as the Elbe River. For details, see paragraph 11 c.

**WITTSTOCK:**

Units of the 18th Kocz Div which had been assembled there during the summer months started departing for the Third Shock Army maneuver area of LITZLING HEATH - ENTENAU and farther to the south by rail and road about 19 September. Other units arrived in PREDLITZAU between 23 and 30 September, probably coming directly from the troop training grounds. The 318th Engr Bn which was in WITTSTOCK during the summer months returned to WITTSTOCK in mid-August.

25X1

**BITTKAU:**

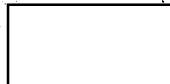

During the first half of September, the camp of the engineer training site was gradually vacated by units of the Third Shock Army.

25X1

KOMMIGS-  
BRUNCK:

Prior to mid-September, the summer quarters along the SCHLEPP-NITZ-SCHMIDKAU road were still occupied as was observed previously. Components of the 25th IL Brig of the IV Arty Corps from PRISCHITZ were at the troop training grounds from 9 to 20 August. A large-scale field exercise involving all units there was held north of KOMMIGSBRUNCK from 6 to 8 September. The first advance parties left the troop training grounds for DRADEN, LEISNIG and LURZEN as early as mid-September, while, at the same time, elements of the 4th Gds AAA Div allegedly transferred to the CHEMNITZ-Zwickau area. Elements of the 11th Gds Tank Div were unloaded in MAISSEN during the period from 19 to 22 September and allegedly marched to the Bohnitzsch Kaserne. Possibly, they were elements of the 45th Gds Tank Regt of the division, whose transfer from KATZ to LEISNIG

25X1

however, that exercises were conducted in the GROSSENMAR area after 20 September.

25X1

The period between the end of September and mid-October is to be the time for the completion of the summer training and the final departure of units to their military posts.

25X1

ZEITMAIN:

The components of the 9th Tank Div that moved to ZEITMAIN in May 1952 were probably still there in September

25X1

JUETERBOG area: Units of the 6th Gds Tank Div stationed in the northern section of Camp WERDER-LANKENAU returned to their permanent quarters in JUETERBOG-JETZ LAGER during the first half of September. However, the bulk of the division was still in the camp at the end of September. During September as well as during the preceding months, the JUETERBOG troop training ground was used for firing practice with live ammunition by artillery and AA units of various armies. The following units were confirmed:

a. From late August

to early September: AA and artillery units of the 9th Kecz Div from MAISSEN; AA units of the 6th Gds Kecz Div from TEMPLIN; artillery units of the 12th Gds Tank Div from NEURUPPIN; and air force AA units from FINOW, WERNERKIRCHEN, and PISTE WILDE.

b. From 24 to 27

September: Elements of the 2d Light Arty Brig (US) from Doeberitz and the 90th IL Regt (US) from SCHMIDLAUDE.

25X1

From late August until about 10 September, the six armies and four corps were assembled in Stalag 1, LUCKENAU.

25X1

vehicles were turned in at the signal repair shop of the GOTG for the installation of new equipment and/or repair. Major components of the 11th Gds Kecz Div from JUETERBOG conducted a field exercise in the area southeast of the post from 16 to 19 September. Air force units participated.

- 8 -

KÖNIGS-  
BRUNCK:

Prior to mid-September, the summer quarters along the SCHLEPP-  
NETZ-SCHEMKAU road were still occupied as was observed  
previously. Components of the 25th IL Brig of the IV Arty  
Corps from PLÜSCHITZ were at the troop training grounds from  
9 to 20 August. A large-scale field exercise involving all  
units there was held north of KÖNIGSBRÜCK from 6 to 8 Sep-  
tember. The first advance parties left the troop training  
grounds for DRÖSLWITZ, LEISNIG and WILZEN as early as mid-Sep-  
tember, while, at the same time, elements of the 4th Gds AAA  
Div allegedly transferred to the CHEMNITZ-ZICKAU area. Ele-  
ments of the 11th Gds Tank Div were unloaded in MÖLLEN  
during the period from 19 to 22 September and allegedly  
marched to the Bohnitzsch Kaserne. Possibly, they were ele-  
ments of the 45th Gds Tank Regt of the division, whose trans-  
fer from KAIFENZ to WEISSEN [REDACTED]

25X1

[REDACTED] that exercises were con-  
ducted in the GROßGÖTTENHAIN area after 20 September. [REDACTED]

25X1

[REDACTED] the period between the end of September  
and mid-October is to be the time for the completion of the  
summer training and the final departure of units to their  
military posts.

25X1

ZEITMAIN:

The components of the 9th Tank Div that moved to ZEITMAIN in  
May 1952 were probably still there in September [REDACTED]

25X1

JÜTERBOG  
area:

Units of the 6th Gds Tank Div stationed in the northern section  
of Camp WERDER-BURKHARDT returned to their permanent quarters  
in JÜTERBOG-ALTSIEDLUNG during the first half of September.  
However, the bulk of the division was still in the camp at the  
end of September. During September as well as during the  
preceding months, the JÜTERBOG troop training ground was  
used for firing practice with live ammunition by artillery and  
AA units of various armies. The following units were con-  
firmed:

a. From late August

to early September: AA and artillery units of the 9th Nacz  
Div from WEINRACH; AA units of the  
6th Gds Nacz Div from THALPIN; artillery  
units of the 12th Gds Tank Div from NEU-  
RUPPIN; and air force AA units from  
PINNOW, WERNERKIRCHEN, and PISTORIUS.

b. From 24 to 27

September: Elements of the 2d Light Arty Brig (US)  
from Doeberitz and the 90th IL Regt  
(US) from SCHÖNHALDE.

25X1

From late August until about 10 September, [REDACTED]  
the six armies and four corps were assembled in Stalag I,  
LUCKA-MÜLLE.

25X1

[REDACTED] vehicles were used at  
signal repair shop of the GOFG for the installation of new  
equipment and/or repair. Major components of the 11th Gds  
Nacz Div from JÜTERBOG conducted a field exercise in the  
area southeast of the post from 16 to 19 September. Air  
force units participated.

SECRET

SECRET

- 9 -

25X1

25X1

**MISS. ASKER:** The bulk of the 9th Ncz Div was still confirmed at the troop training grounds at the end of September. [redacted]

25X1

[redacted] the division was to move but on 5 October for a maneuver which would last 8 to 10 days. Subsequently, the troops would return to their military posts.

**TEPLIN:**

There were no changes in the occupation of the troop training grounds until the middle of September. Prior to that date, only local exercises were conducted. These exercises included bridge construction on Fauler Lake and near KAISERNBURG by engineer units as well as tank practices at battalion strength in which engineer troops equipped with flame throwers participated. Units of the 6th Gds Ncz Div and army troops of the Fourth Gds Ncz Army started departing to their WERNIGSWALDE, BERNHAU and BAD FISCHAU posts about 17 September. Other units also departed simultaneously for practices in the area of RATHENOW and farther to the east. See also paragraph 11 b. It is expected that the 25th Tank Div will return about 15 October, but it is possible that, as was previously suggested, individual elements of the division may remain at TEPLIN.

**LIMBEROSE:**

The units of the 7th Gds Ncz Div from FRANKURT/Oder will [redacted] return to their post during early October. No information regarding a participation in fall maneuvers has been received.

25X1

6. In August and September, the three divisions and army troops subordinate to the Second Gds Ncz Army again conducted field exercises separately from the units of the other armies. [redacted]

25X1

From 8 to 11 August: Tank exercises in the area of KUTTENIG north of TEPLIN, by major tank, engineer and motorcycle units of the 9th Gds Tank Div.

From 16 to 18 September:

Exercises with air force support of many units of the 1st Ncz Div and the 12th Gds Tank Div in the area of the DOEDERLITZ troop training grounds.

From 16 to 19 September:

A large-scale exercise of elements of all divisions including army engineer troops from NEULANDENBURG and elements of the IV Arty Corps and air force in the area north of LAMMENOW. The Havel River was crossed near ALBERTSTEIN.

From 23 to 26 September:

A combat group of the 9th Gds Tank Div engaged in exercises in the RIMMERSBERG-MIROW area.

From 24 to 27 September:

Elements of the 26 Light Arty Brig (US) from DOEDERLITZ and of the 90th RL Regt (US) from SOEST-ALDEN practiced firing with live ammunition at JUNGFELD.

SECRET

SECRET

- 10 -

25X1

Special Exercises.7. Artillery.

Prior to about 18 September, the ALTEGRAUEN troop training grounds was still occupied by the bulk of the brigades of the IV Arty Corps and the two army artillery brigades of the Eighth Gds Army and the Third Shock Army. Major elements of the IV Arty Corps departed on 18 and 19 September to participate in large-scale exercises of the Fourth Gds Necz Army in the RATHENOW area and of the Third Shock Army in the LUTZLICH area. The ALTEGRAUEN quarters were only lightly occupied after the departure of these troops. In addition to the above mentioned units, elements of the following units practiced firing at ALTEGRAUEN during the period from mid-August until mid-September: Components of the 31st AA Div of the Second Gds Necz Army which were shipped to BORTZOW on 27 and 28 August; components of the 24th and 25th RL Dns (US) of the 20th and 21st Gds Necz Divs and elements of the 316th and 914th RL Regts (US) of the XXVIII and XXIX Gds Rtz Rifle Corps from 30 August to 10 September.

8. AA Units.

the 4th AT Arty Brig (US) of the IV Arty Corps from DREIGEN and of the 3d Gds AAA Div of the Third Shock Army from SAGENBURG were shipped to the JUSTROW firing range during the period from 3 August to 20 September. The following units left the firing range during the same period:

AAA units of the 18th Necz Div for the JETTSTOCK troop training grounds.

An air force AAA unit for PUERTHNE airfield.

Components of the 4th AT Arty Brig (US) of the IV Arty Corps for BRIGEN.

Unidentified AAA units of the Second Gds Necz Army for FUNKSTENBERG.

Components of the 63d AAA Div (US) of the Fourth Gds Necz Army for EBERSWALDE and FUNKSTENBERG.

Components of the 13th AAA Div of the Eighth Gds Army for WEILAR.

Components of the 6th Gds AAA Div (US) of the IV Arty Corps for CHEMNITZ.

Components of the 2d Gds AAA Div of the IV Arty Corps for RICHAUTN-KLAUSDORF.

Components of the 4th Gds AAA Div of the first Gds Necz Army for KOMMIGSBUECK.

Components of the 31st AAA Div of the Second Gds Necz Army for SCHERWALDE.

Components of the 3d Gds AAA Div of the Third Shock Army for MAGDEBURG.

AA unit of the 24th Gds Rtz Rifle Div and/or of the IX Rtz Rifle Corps for SCHWINK.

additional shipments were to be dispatched from ALTEGRAUEN railroad station after 20 September and that the firing range was to be vacated by 1 October. The range is to remain unoccupied until 1953.

SECRET

SECRET

- 11 -

25X1

9. Engineer Troops.

On 15 September, elements of the 35th Engr Rgt (US) of the Third Gds Ncz Army were shipped from SPANDENBERG to BITTKAU while other elements were shipped to the BITTKAU training site via the TANGER-MUELTE railroad station. For details on exercises of these units in the BITTKAU area, see paragraph 11a.

10. RUEGEN Island.

Elements of the 4th AT Arty Brig (US) of the IV Arty Corps from RUEGEN Island practiced firing with live ammunition at USTROW firing range at the end of August and the beginning of September. [redacted] while visiting the island in the middle of September, Marshal S.K. Timoshenko also inspected the components of this brigade. His appearance there tends to indicate that in his capacity as commander-in-chief of the White Russian ND, he may also have certain powers regarding the command and inspection of Soviet forces in Eastern Germany.

25X1

Fall Maneuvers.

11. Large-scale field exercises closing the 1952 summer training began in the middle of September which is two to four weeks earlier than in the preceding years. Individual phases of the exercises lasted about 1 October, when the troops subsequently returned to their military posts. 25X1 However, it is reasonable to assume that other fall maneuvers will be conducted after 10 October, involving only those units which have hitherto not participated in this year maneuvers.

a. Third Gds Ncz Army.

Components of the 35th Engr Rgt (US) of the army were transferred from SPANDENBERG to BITTKAU on 15 September. See paragraph 9. After [redacted] about 17 September, exercises were conducted in this area [redacted] involved other [redacted] 25X1 components of the army whose arrival in this area was not [redacted] 25X1 A bridge was constructed over the Elbe River near SANDWIRTH during the exercise in which air force units also participated. The departure of individual units of the 7th Gds Tank Div on 22 September from the HENTZIN railroad station makes it appear possible that divisional components from LUELLEWATH participated in the maneuver which is believed to have terminated about that time. The subject of the maneuver presumably was an attack from west to east with river crossing.

b. Fourth Gds Ncz Army.

After 21 September, elements of the Fourth Gds Ncz Army, including major elements of the 6th Gds Ncz Div and 63d AA Div (US) started departing by rail from the WILPLIN troop training grounds toward the southwest via COLDENBERG. The bulk of the shipments was unloaded at the SCHLICH railroad station near KAHMEN from where the units proceeded to the training area south of RATHENOW-INSERHAUSEN, apparently by road. Units of the 10th Gds Tank Div arrived in the RATHENOW area by rail. These units, supported by elements of the IV Arty Corps, fighter and AA units began field exercises in the area about 22 September. During the course of the maneuver which terminated about 25 September, a bridge was constructed across the Havel River near WILPLIN south of LUELLEWATH. The bridge was used by tanks when attacks were launched from east to west. The subsequent return movement to the ABERS ALDE, BAD FREIHALDE and WILHAU military posts lasted until 28 September.

SECRET

- 12 -

25X1

c. Third Shock Army. All units of the Third Shock Army began to assemble by road and rail between 12 and 20 September. The movement lasted until 29 September and most of its shipments were identified as they passed through PEILZBERG in a southerly and southeasterly direction, through STENDAL, and en route on the STENDAL-JAGDWEHR line. The arrival in the area of LETZLING BEATH of elements of the 6th and the 34th Arty Div (MS) from ALTENHAGEN and POTSDAM coincided with this movement. Details on the course of the exercises conducted by these units, are not known. There are indications, however, that the maneuvers were conducted only by combat groups. It is known that the northern and eastern edge of the LETZLING BEATH and, according to troop movements, the area northwest of HATENEN, where river crossings were possibly practiced on the Javel River, were the main training areas. The first units departed by rail and road from the training area on 30 September and on 1 and 2 October and went northward in the direction of PEILZBERG and to the IV Arty Corps posts of LUTTICHEN and PLUMITZ.

d. First Gds Rds Rocz Army.

Field exercises of components of the First Gds Rds Rocz Army which had arrived from KOWIENRUCK, began after 20 September, possibly in the LUDWIGSHOFEN area. Air force units also participated in this maneuver.

Personnel.

12. The exchange of personnel started in the middle of September as had been expected. [REDACTED] several railroad districts 25X1 [REDACTED] transitway, empty trains for troop shipments were to be made available by about 10 September. The first east-bound shipments of troops were observed after 13 September and the first west-bound shipment with troops after 19 September. Up to 2 October, 3 trains with recruits and 4 trains with discharges [REDACTED] 25X1 [REDACTED] The exchange program is expected to be continued as further empty rolling stock for shuttle traffic has to be made available.

Transportation.

13. [REDACTED] the traffic situation was normal. After mid-September, the number of railroad cars claimed by the Soviets increased considerably, probably in connection with the large-scale maneuvers held in Eastern Germany at that time.

25X1

14. The coal reserve continued to rise slowly and, on 11 September, was adequate for 13 days' requirements. [REDACTED] a conference of representatives of the SCC and the Directorate General, Railroads, Berlin, held between 13 and 20 September, that the coal reserve of the East German Railroads was to be increased to 60 days' requirements. The fixed target of 480,000 tons of hard coal and 40,000 tons of brown coal briquettes is to be reached by the end of 1952. The establishment of a coal reserve is not unusual, especially during the winter months. In the winter of 1949/1950, a reserve of 100,000 tons of coal had to be established

[REDACTED] ILLEGIB

SECRET

- 13 -

25X1

15. Except for local fluctuations, rail traffic through border stations on the Oder-Neisse line remained normal, special transportation operations included:

- The vehicle replacement program under way since mid-February 1952.
- The return of former German freight cars re-purchased from the U.S.S.R. by the East German railroad administration.
- The shipment to Eastern Germany of tanks, armored scout cars, rocket launchers, and armored personnel carriers. From the places to which these shipments were dispatched it was concluded that most of this equipment was consigned to the VP.

16. Railroad Construction Projects.

25X1

a. Work was continued on the railroad construction projects [redacted]. Because of a shortage of labor and construction materials, the completion dates fixed for the individual projects could not always be kept. Thus, for instance, the completion date for the Nordring BERLIN had to be postponed from 15 to 30 September.

b. In early September, work on the reconstruction of the railroad viaduct over the Neisse River near GÖRLITZ was started. The reconstruction of this viaduct would open a seventh border crossing point on the Oder-Neisse line. GÖRLITZ is on the modern LĘBĘG-CHŁOCOW-Upper Silesia-HIRSCHBERG-DRÜSEN railroad line, which is of the greatest importance for coal shipments from Upper Silesia. In the event of an increase of Soviet transit traffic through Poland, this line could be used to ease the strain on the other transit lines.

Supply.

17.

the field

25X1

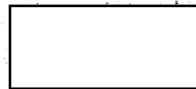

[redacted] supply, emphasis was centered on the vehicle exchange program and the shipment of equipment for VP units. From February to 21 September 1952, a total of 10,173 new vehicles was shipped to Germany, while 8,315 used vehicles were returned to the U.S.S.R. The number of new vehicles delivered by the U.S.S.R. now equals about 20 percent of the total vehicle equipment of Soviet troop units stationed in Eastern Germany. An unusually large number of tanks and other equipment was delivered to the VP during the period from early August to mid-September. Most of the equipment was sent to eastern Mecklenburg. From late April to about mid-September, about 1,300 guns of all calibers, 800 tanks and SP guns in addition to 150 armored scout cars and armored personnel carriers were shipped from the U.S.S.R. to Eastern Germany. The two supply programs caused most of the increase in the volume of rail supply shipments from the U.S.S.R., so that it rose from a monthly average of about 1,000 carloads to 2,700 carloads in August 1952. The shipments included 1,161 flatcars with vehicles, 267 flatcars with tanks, and 253 flatcars with artillery pieces. These operations also affected interzonal supply traffic, however, in other respects it was normal. A total of 476 carloads of ammunition, 334 of which were consigned to the VP, were the first sizable ammunition shipments observed since May 1952.

- 14 -

18. General Information on Supply Installations.

- a. The Main Clothing Depot of the GORF, [ ] was transferred from BERNAU to FRANKFURT/Oder, and allegedly occupied a construction material depot of the Kesch in mid-September. See also paragraph 3f. 25X1
- b. The tank repair shop, [ ] at WUENSDORF, is subordinate to the GORF, as it overhauls 30 tanks per month. It has the same capacity at the tank repair shop, [ ] 25X1
- c. The 65th Motor Trans Regt of the GORF, [ ] in POTSDAM-WILDPARK, allegedly received 120 tank trucks from the Ifa Plant, LEIPZIG, in July 1952. It must therefore be expected that a tank truck column with a capacity of 350 to 400 cubic meters will be activated with this supply regiment. 25X1

German Volkspolizei.19. Armeegruppe Nord.

About the beginning of August 1952, a center of activation was formed in northeastern Germany under the supervision of a high-echelon VP headquarters [ ] as Armeegruppe Nord. This unit included at least two divisions each in the areas of AGGEMIN-TORGELOW and PRORA on Ruegen Island, and troops. Most of the troops are stationed in the PRERAU-PASEWALK-AGGEMIN-TORGELOW area. The assignment to the Armeegruppe Nord of the newly activated cadre division PINKOW, which has at present a strength of about 3,000 men, and of the cadre division ROSTOCK has not been definitely proved but appears possible. The filling up of the Armeegruppe Nord with personnel from other cadre units during the period from the end of July until the end of August coincided with the equipping of this units with arms and other items which, however, continued in September. It appears that the delivery of arms decreased after mid-September, while the shipments of motor vehicles and prime movers from German and Russian firms continued to arrive.

25X1

The Armeegruppe Nord is believed to have a present total strength of at least 50,000 men, and about 300 tanks and SP guns. About 400 tanks and SP guns were issued to the units in the AGGEMIN-TORGELOW area and the remainder to the units in PRORA on Ruegen Island. All arms consigned to the VP by the Soviets are shipped to PRERAU from where they are distributed to the individual units. [ ]

25X1

[ ] two mechanized divisions and two motorized rifle divisions are in existence in the Armeegruppe Nord and PINKOW and ROSTOCK areas. The training of units was delayed as a large percentage of the VP is committed to the construction of winterized quarters.

20. Other Areas. Since 10 September, 51 tanks have been issued by the tank distribution point of the Kasernierte Volkspolizei (KVP) to ROSTOCK and 57 tanks to the southern area of Eastern Germany. This might be the beginning of an equipment program for further cadre units of the KVP. No information indicating that the units have been fitted up to strength has been obtained. [ ] in addition to Armeegruppe Nord, two other Armeegruppen will be formed, namely Armeegruppe Nette with the headquarters presumably in BRIELENBURG, and Armeegruppe Sud with the headquarters presumably in LUDWIGSBURG or Thuringia. Of special interest were observations indicating that several cadre units are apparently being dissolved as, for example, those in LEWISLAUSSEN, ZEITLAU, and ZITTAU, and also the amalgamation of the two divisions in QUEDLINBURG and DRESDEN into one division in DRESDEN and the amalgamation of the two divisions in LEIPZIG I and II into one division in LEIPZIG.

25X1

SECRET

- 15 -

25X1

Although it is still too early to draw definite conclusions from these observations, there is a possibility that only about 16 KVP divisions rather than 24 will be activated. This would mean that six divisions each would be assigned to Armeegruppe Nord, Armeegruppe Mitte, and Armeegruppe Sud. The officers' academy of the KVP was transferred from DUESSEN-KOENIGSTEDT to LUDWIGSHafen-KIRCH at the beginning of September. A short time later, the cadre division GULDENBURG was transferred to DUESSEN-KOENIGSTEDT.

21. Ministry for National Forces.

At the beginning of September, the ministry exchanged its quarters on Glinkastrasse, BERLIN, with those of the Bureau for Economic Affairs on Schmollerstrasse, [redacted]

[redacted] in August as compared to that in June and July. The personnel strength increased from 150 persons at the beginning of August to 1,200 persons at the end of September. [redacted]

[redacted] Several key officers of the former NVA were reassigned to the Ministry for National Forces, which, though it attempts to conceal its military character is unable to do so.

25X1

22. Summary.

The activation of the so-called National Forces from the KVP progressed rapidly during September. However, no large units are ready for commitment, as the units are not completely motorized and the status of training is still insufficient.

AUSTRIA.Order of Battle.
